

AECON

Delivering self-perform, multi-discipline industrial construction for refineries and chemical facilities across the U.S. Gulf Coast.

We support Gulf Coast refineries, chemical facilities, and terminals with capital projects, brownfield upgrades, turnarounds, and ongoing maintenance in live operating environments. Backed by our North American footprint and project delivery systems, Aecon provides integrated planning-to-execution solutions with a focus on safety, quality, and schedule certainty.

Aecon brings deep self-perform expertise to complex industrial projects

We deliver fabrication and modularization strategies that help reduce field risk and improve productivity.

✔ Capital Construction & Upgrades

Unit work, pipe racks, utilities/offsites, tie-ins

✔ Turnarounds & Maintenance

Disciplined planning, workforce execution, coordination with operations

✔ Fabrication & Modularization

Beaumont facility shifts work offsite, improving safety and schedule

✔ Multi-Discipline Delivery

Self-perform execution supported by project controls and supervision

Committed to supporting the community of Jefferson County

Aecon's Gulf Coast presence is supported by strong local roots in Jefferson County. As a long-term partner in the region, Aecon invests in people and relationships with a focus on local hiring, supporting workforce development and safety training, and engaging area suppliers and subcontractors. Aecon helps create sustained opportunities that support the local economy while delivering safe, high-quality outcomes for industrial owners and operators.
